Cuba reports 75 new COVID-19 cases and one death

Havana, December 7 (RHC)--Cuban health authorities reported 75 new infections of COVID-19 and one death on Tuesday.

According to the Public Health Ministry website, there were 474 confirmed cases hospitalized island-wide.

With the latest update, Cuba accumulates 963,269 diagnosed cases and 8,311 deaths associated with viral respiratory disease.

With 22, Holguin province remains to report the highest number of cases.
