

European Parliament Favors Dialogue with Cuba

Strasbourg, April 11 (RHC)-- European Parliament groups are in favor of the legislative body supporting the political dialogue agreement between the European Union and Cuba.

The European legislative body will vote for the approval of the rapprochement between both parties and a resolution with its position on the agreement of last December between London and Havana.

The European Parliament's specialist, Elena Valenciano, was satisfied after the debate in the parliamentary committee because no party was against approving new relations with Cuba.
