

# *Donald Trump Posts Bizarre Tweet of Him as the Moon 'Eclipsing' Obama*

---

Washington, August 25 (RHC)-- U.S. President Donald Trump has re-tweeted a bizarre photo of himself "eclipsing" former President Barack Obama. Sent to millions of his followers, the caption reads: "The best eclipse ever," showing a picture of the grinning Trump, in full color, moving in front of an image of Obama, who is shown in black and white.

On Monday, Americans witnessed the extraordinary sight of a total solar eclipse across the country from coast to coast. Millions from Oregon to South Carolina whooped and cheered as the moon blotted out the sun.

Some observers said that Trump apparently wants the same attention from his supporters as the solar eclipse earlier this week.
