

Israel targets Gaza Strip with artillery fire, killing three

Gaza City, July 26 (RHC)-- At least three people have been killed in Israel's latest series of attacks that targeted multiple locations throughout the Gaza Strip.

Gaza's Health Ministry on Wednesday announced that another Gazan was also critically injured while Israeli forces hit the town of Beit Lahia and other locations with artillery fire.

Israel claims that the attacks were in response to gunfire which originated from the besieged coastal territory. The Israeli military frequently bombs the Gaza Strip, with civilians being the main target of such attacks.

On Saturday, Israeli artillery units targeted a position of the Palestinian Hamas resistance movement in the Gaza Strip only hours after it was announced that the Tel Aviv regime had reached a truce with Palestinian factions in the Palestinian enclave.
