

Israeli siege, assaults totally or partially affect 100 percent of Gaza factories

Gaza City, October 8 (RHC)-- A Palestinian legislator says 100 percent of factories in the blockaded Gaza Strip has been completely or partially affected by the 14-year-long siege imposed by the Israeli regime on the enclave and successive assaults against the sliver.

Palestinian lawmaker Jamal al-Khudari, who is the head of the Popular Committee against the Siege on Gaza (PCAS), made the remarks in a press release, saying the occupying regime is deliberately targeting the Palestinian economy, especially the industrial sector.

He said Tel Aviv is still imposing restrictions on the entry of industrial materials into the besieged territory under the pretext of dual use, the Palestine Information Center quoted him as saying.

Khudari, who is originally an academic and businessman, also pointed out that these measures have exacerbated the suffering of factory owners, workers and technicians. According to the Palestinian legislator, the direct and indirect losses inflicted on Gaza, including on such sectors as industry, commerce, agriculture and business, are estimated to be at \$70 million every month.

Khudari also affirmed that 3,500 factories had already shut down in the sliver, whose poverty rate has reached 85 percent and its unemployment rate exceeded 60 percent. He stressed that removing the blockade is the only solution to end the suffering of Gazans, calling on the international community to exert more effort to pressure Tel Aviv to lift its crippling siege.

The Gaza Strip has been under an Israeli blockade since June 2007. It has caused a decline in the standard of living as well as unprecedented levels of unemployment and unrelenting poverty. The occupying regime has imposed three major wars against Gaza, killing thousands of people each time and shattering the impoverished territory's already poor infrastructure.

The economic situation across Palestinian lands worsened after the US earlier this year cut all its financial aid for Palestinians in the occupied West Bank and Gaza. The cuts in the humanitarian aid were soon hitting hundreds of thousands of the most vulnerable people, especially in Gaza, where 80 percent are dependent on aid.

Washington has ended all financial aid for Palestinians in the occupied West Bank and Gaza. Palestinians have held weekly rallies along the Gaza fence to protest the siege on the enclave and demand the right for the refugees, who were forced to leave during the 1948 creation of Israel, to return to their homes.

Some 310 Palestinians have been killed by Israeli forces ever since the anti-occupation protest rallies began in Gaza on March 30, 2018. Over 16,000 Palestinians have also sustained injuries.
