

India reports more than 8,000 new cases

New Delhi, June 1 (RHC)-- India reported more than 8,000 new coronavirus cases in a single day, another record high that topped the deadliest week in the country.

Confirmed infections have risen to 182,143, with 5,164 fatalities, including 193 in the past 24 hours, the health ministry said.

Overall, more than 60 percent of the virus fatalities have been reported from only two states - Maharashtra, the financial hub, and Gujarat, the home state of Prime Minister Narendra Modi. The new cases are largely concentrated in six Indian states, including Delhi, home state of the capital, New Delhi.
