

Facebook workers stage virtual walkout over Trump inciting violence

New York, June 3 (RHC)-- Facebook employees have staged a virtual “walkout” in solidarity with the nationwide demonstrations and to protest Facebook’s handling of Trump posts that “incite violence.”

Last week, Twitter placed a warning on a Trump post that included the phrase “when the looting starts, the shooting starts,” saying it violated rules about glorifying violence.

But Facebook and CEO Mark Zuckerberg declined to take any action on the same post, despite concerns voiced by a growing number of his staff.
