

EasyJet to resume some flights in UK

London, June 15 (RHC)-- Britain's EasyJet resumes operations with a limited number of domestic flights within the UK. The first left Gatwick Airport for Glasgow early Monday morning.

All passengers have to wear face masks, aircraft cleaning will be enhanced and no food services offered.

EasyJet plans to add more services as the months progress and expects to be flying about three-quarters of its routes by August, but at a much lower frequency.
