

Greece registers 19 new coronavirus cases

Athens, July 19 (RHC)-- Greek authorities announced 19 new cases of coronavirus and no new deaths over the past 24 hours, the Associated Press news agency reported. Total confirmed cases in Greece since the outbreak of the epidemic are 3,983, with 194 deaths.

Despite the relatively low number of cases, authorities are concerned about increasing evidence that social distancing guidelines are not being followed. On Saturday, they extended the requirement to wear masks to supermarket customers --- and they are considering expanding the mask requirement further.
