

Brazil reports record daily coronavirus toll as deaths surpass 90,000

Brasilia, July 30 (RHC)-- Brazil reported a record one-day death toll of nearly 1,600 Wednesday, even as far-right President Jair Bolsonaro lifted a ban on foreign travelers and demanded a rollback of other public health measures.

Brazil's official death toll is 90,000, though public health experts say the true number is likely much higher.
