

Brazil reports 16,389 new coronavirus cases and 363 deaths in 24 hours

Brasilia, September 22 (RHC)-- Brazil's health ministry has reported 16,389 additional confirmed cases of the coronavirus, bringing the total number of infections to more than 4.52 million, although the latest numbers do not include three states.

At least 363 new deaths were also reported. Nearly 137,000 people have died from COVID-19 in Brazil, second only to the United States.
