**Donald and Melania Trump were secretly vaccinated against COVID-19 in January**

New York, March 3 (RHC)-- Former President Donald Trump and Melania Trump were secretly vaccinated against COVID-19 in January before leaving the White House.

According to The New York Times, CNN and other outlets, all report that the Trumps didn't want to alienate supporters in the anti-vaccine movement by broadcasting images of their inoculations. Millions of Trump's supporters believe that the vaccine is poisonous and have refused to be inoculated.
