Havana, November 9 (RHC)--Cuban health authorities reported 467 new COVID-19 cases and five deaths.

According to the Public Health Ministry website, there were 2 529 active cases hospitalized as of midnight.

The Caribbean island totaled 956 919 cases and 8 270 deaths since the beginning of the pandemic in March 2020.

Sancti Spiritus, Holguin, and Camaguey were the provinces reporting the highest number of cases.
