Caracas, May 24 (RHC)-- The multi-media giant teleSUR is changing its satellite parameters to expand its high quality signal, starting June 1, in Latin America and the Caribbean, both in Spanish and English.

It will have a wider reach in Latin America and the Caribbean. Changes will also be implemented soon in the signal that reaches Europe, the Middle East and Africa.

In this way, teleSUR places technology at the service of the people, so that their realities and stories reach different corners of the world. The news multi-platform news service will continue to guarantee its users truthful content that questions the hegemonic media's narrative, offering its high-quality programming for South America, Central America, the Caribbean, the United States, Europe, North Africa and the Middle East.

At the same time, teleSUR invites cable operators and users to confirm reception of the new signal by e-mailing comercializacion@telesurtv.net and telesurcomercializacion@gmail.com.

Get to know the teleSUR HD parameters in English and Spanish. The parameters of teleSUR HD in Spanish are as follows:

Satellite: IS-34; Band: C; Downlink Polarity: Horizontal; Downlink Frequency: 4110.75 Mhz; Symbol Rate: 3,750 Msps; Standard: DVB-S2; Modulation: QPSK; FEC: 5/6; Roll-off: 20%; Service: 1-TELESUR HD.

Satellite: IS-14; Band: Ku; Downlink Polarity: Vertical; Downlink Frequency: 11,733.50 Mhz; Symbol Rate: 7,500 Msps; Standard: DVB-S2; Modulation: QPSK; FEC: 5/6; Roll-off: 20%; Service: 1-TELESUR HD.

While the parameters of teleSUR HD in English are as follows:

Satellite: IS-14; Band: Ku; Downlink Polarity: Vertical; Downlink Frequency: 11,733.50 Mhz; Symbol Rate: 7,500 Msps; Standard: DVB-S2; Modulation: QPSK; FEC: 5/6; Roll-off: 20%; Service: 3 - TS English.
