

The Lancet reports immediate action on climate could save the lives of millions

A new report by the British medical journal The Lancet finds efforts to mitigate climate change can still deliver a future where people can not only survive, but thrive

London, October 28 (RHC)-- A new report by the British medical journal The Lancet finds efforts to mitigate climate change can still deliver a future where people can not only survive, but thrive

The report's lead author Dr. Marina Romanello said in a statement: "There is clear evidence that immediate action could still save the lives of millions, with a rapid shift to clean energy and energy

efficiency.”
