London, November 11 (RHC)-- In Britain, activists with Just Stop Oil brought parts of the nation's busiest highway to a standstill for a fourth straight day to demand the U.K. government stop all new oil and gas projects. Protesters climbed on highway sign overpasses, forcing police to shut down traffic.

Dozens have been arrested this week, including youth activist Louise Harris. She told reporters: "Over a thousand people in the U.K. died in just a few days because of the 40-degree heat, because of the climate crisis, which is fueled by oil, gas, coal, fossil fuels. And our government, they want more. It is an act of murder! And this is an act of self-defense, and we need you to join us in order for this to work, in order for our murderous government to take action and listen. How many more people in Pakistan, in Nigeria have to die before they listen? Even in the U.K.!"
