

Bolivian Graduates in Cuba Condemn U.S. Aggression

La Paz, August 14 (PL-RHC) -- The Association of Bolivian Physicians in Cuba have repudiated U.S subversive plans against the Caribbean nation, and demanded the end of the trade, financial and economic blockade imposed by Washington more than 50 years ago.

Those professionals marched to the U.S. embassy with Cuban flags, chanted slogans in support of the island's people and government, and rejected the White House's 'destabilizing actions'.

Using programs ostensibly to fight AIDS but designed to manipulate young Cubans shows that the United States has no limits and it is capable of manipulating youth against the Cuban Revolution, Dr Blas Choquehanca told the Press.

Meanwhile, Lenin Vladimir Calisa, coordinator of the Association in La Paz department, stated that those actions represent harassment against the people of the island and its development.
