

# *Israeli military attacks worsen humanitarian crisis*

---

Gaza City, October 13 (RHC)-- Gaza's humanitarian crisis is deepening as Israel continues to pummel the besieged Palestinian territory with air and artillery attacks for a sixth straight day, reducing whole neighborhoods to rubble.

Gaza's Ministry of Health reported on Thursday that Israel's attacks have killed more than 1,350 Palestinians and wounded more than 6,000. More than 320 children are among the dead. Survivors have been seen searching the rubble of their homes for lost possessions — and food.

One of the survivors on the ground, Azaam Shamiya, said: "We left our homes thinking we would return in an hour. We left our belongings, money, food and everything we owned. Now there are 50 people left homeless without food, drink, water or electricity. I do not know how we will provide food for our children. I am searching here under the rubble for even the remains of lentils and rice, even a little for my children."

Israel's energy minister said no basic resources or humanitarian aid, including water, will be allowed into Gaza until Hamas releases hostages. His warning came after Gaza's only power station ran out of fuel, plunging the territory into darkness.

The International Committee of the Red Cross warned in a statement> "As Gaza loses power, hospitals lose power, putting newborns in incubators and elderly patients on oxygen at risk. Kidney dialysis stops, and X-rays can't be taken. Without electricity, hospitals risk turning into morgues."

The U.N. agency for Palestinian refugees, UNRWA, reports at least 340,000 Palestinians have been displaced across the Gaza Strip. UNRWA also reports Israeli strikes have killed nine U.N. staffers since Saturday, with bombs damaging 18 schools being used as makeshift shelters . UNRWA's headquarters in Gaza City was also damaged by an Israeli strike.
