The Hermanos Saíz Association brings together the young artistic and intellectual vanguard of Cuba

Havana, Nov 6 (RHC) The 4th Congress of the Hermanos Saíz Association (AHS), an entity that brings together the young artistic and intellectual vanguard of Cuba, begins today at the Convention Palace.

The event will be the space in which youth and culture will define the future of the nation, precisely because they are two of the scenarios to be analyzed in the contest. It will promote knowledge and reach a consensus on the different views of the members of this youth association throughout the country.

Different cultural proposals, varied creative concepts, platforms and cultural management stand out among the concerns of the participants in the event, who will seek to preserve the roots of our culture.

Seeking and making the AHS more like its time, its members, and new art forms is a common consideration for many of those participating in the conclave.

The event is essentially dedicated to the figure of the leader of the Cuban Revolution, Fidel Castro, architect of the AHS. (Source: PL)
