

Israel orders Palestinians to leave areas of southern Gaza

Gaza City, November 17 (RHC)-- Dozens of Palestinians have been killed in a 41st consecutive day of unrelenting attacks by Israel's military on the Gaza Strip. Overnight, Israel's Air Force dropped leaflets over parts of the southern city of Khan Younis ordering people to leave their homes and shelters "for their own safety." Many are being expelled for a second time, after Israel last month ordered more than a million Palestinians to leave their homes in northern Gaza.

On Wednesday, Israeli authorities allowed the first shipment of fuel into the Gaza Strip since early October. The U.N.'s agency for Palestinian refugees, UNRWA, says just over 6,000 gallons of fuel — half a tanker truck's worth — was allowed to cross from Egypt. That's just 9% of what UNRWA says is needed daily to sustain life-saving activities. Israel is not allowing the fuel to be used in hospitals or to power water and sewage pumps.
