

Oxfam report finds the ultra-rich are still getting richer as 5 billion people become poorer

Image not found or type unknown

London, January 17 (RHC)-- As world leaders are gathering in Davos, Switzerland, for the World Economic Forum, Oxfam issued a new report showing that the world's five richest billionaires have seen their wealth double over the past four years while 5 billion others have become poorer.

Oxfam is predicting the world could have its first trillionaire in a decade.

Oxfam's interim executive director, Amitabh Behar, spoke in Davos. Amitabh Behar: "I certainly feel angry. You know, I would say having billionaires is a failure. Very often when we're here at the World Economic Forum, you end up celebrating billionaires. But I think it's a sign of failure that we have 800 million people — 10% of the global population — sleeping hungry. They do not have enough food to eat, 800 million people. And on the other hand, you have these billionaires with their private yachts, private jets and a lifestyle which cannot even be understood."
