

Made-in-India killer drones fly in Gaza sky as Israeli genocide rages on

Image not found or type unknown

Khan Younis, February 14 (RHC)-- A new report reveals that an Indian conglomerate has exported Hermes drones to Israel, very similar to those extensively used in Israel's military campaign in Gaza, which have resulted in the death of over 28,300 people, including at least 12,300 children.

Three people sheltering inside the health center were shot dead by snipers with another seven wounded after Israeli forces dropped pamphlets ordering hundreds inside to flee, on Wednesday. "Three people have been martyred and 10 others injured inside the Nasser Medical Complex in Khan Younis [...] by bullets of the Israeli snipers since yesterday evening," said Ashraf al-Qudra, the Health Ministry spokesman, in a statement.

The helpless Gazans who are desperate to leave the Gaza Strip, have traveled to the south Rafah border in search of a safe haven. Since January, Khan Younis has been experiencing massive Israeli ground invasion.

The UN rights chief Volker Turk has warned that ground invasion of Rafah risks further atrocious crimes.
