

Palestinian Americans share stories of loved ones in Gaza killed by Israel

Image not found or type unknown

New York, March 7 (RHC)-- In New York City, a delegation of Palestinian Americans who have lost relatives to Israeli attacks in Gaza joined UN Palestinian envoy Riyad Mansour at a Security Council press conference Wednesday.

Dr. Rula El-Farra has lost over 150 family members since October 7th. “In December, one of our family members, Sabri El-Farra, was murdered in his home by an Israeli airstrike with his nine young children. His unfortunate wife survived. She was eight months pregnant. She was displaced to an evacuation camp, where she gave birth to her baby boy one month later, in January. ... Her child, her newborn infant, died 20 days later from the cold and the harsh conditions in the camps. ... Every minute signifies the loss of a life, the starvation of a child. And so, we need an immediate and permanent — not temporary, permanent — ceasefire NOW.”
