

Israeli forces raped, tortured and executed Palestinian women at Al-Shifa Hospital

Image not found or type unknown

Havana, March 24 (RHC) -- Zionist forces kidnapped, raped and killed Palestinian women during their offensive against Al-Shifa hospital in the Gaza Strip, according to a witness quoted by Qatar's Al Jazeera channel.

Jamila al-Hissi, who was trapped in a building around the hospital, said she had seen firsthand the Israeli army's brutalities against the women.

"They raped women, kidnapped women, executed women and pulled their corpses out from under the rubble and let their dogs loose," al-Hissi said.

The Palestinian woman spent six days inside the building before being driven out by Israeli troops, then described Al-Shifa hospital as a "war zone."

Recounting her experience of being besieged in a house, she asked, "Is there anything worse than this, is there anything more horrible than listening to women calling for help and when we tried to communicate with them to give them help, they would shoot at us?"
