

Euro-Med affirms Israel killed 563 people near aid sites

Image not found or type unknown

Geneva, April 6 (RHC)-- The human rights organization Euro-Med (Euro-Mediterranean Human Rights Monitor) has released a report this week that found Israel killed 563 Palestinians and injured over 1,500 as Israeli occupation forces targeted distribution centers, workers, and civilians waiting for aid.

The Palestine Red Crescent Society (PRCS) called for immediate action to halt the bloodshed. Nebal Farsakh, with the PRCS, said: "Fifteen members of our teams were killed since the beginning of the war, those dedicated heroes who lost their lives in service to others. We mourn the loss of our colleagues, our friends and our loved ones. We cannot wait any longer. Civilians, humanitarians and medical personnel must be protected and respected. The international community must take action now to end the suffering in Gaza."
