

Israeli warplanes attack Lebanon overnight, killing Hezbollah fighters

Beirut, April 18 (RHC)-- Israeli fighter jets attacked sites in the area of southern Lebanon's Khiam town overnight and killed two Hezbollah fighters in the Kfar Kila area, the military said.

Several Hezbollah "infrastructure" sites were attacked near Khiam, including two military buildings, the Israeli military said on social media, alongside grainy footage of nighttime explosions destroying buildings and what appears to be a vehicle.

Late on Wednesday night, Hezbollah said it had targeted Israeli soldiers while they were attempting to evacuate a military vehicle that Hezbollah claimed to hit a day earlier in the Metula area of northern Israel.
