after Israeli forces issue a new
evacuation order*

ISRAEL'S WAR ON GAZA

Rafah border crossing closed

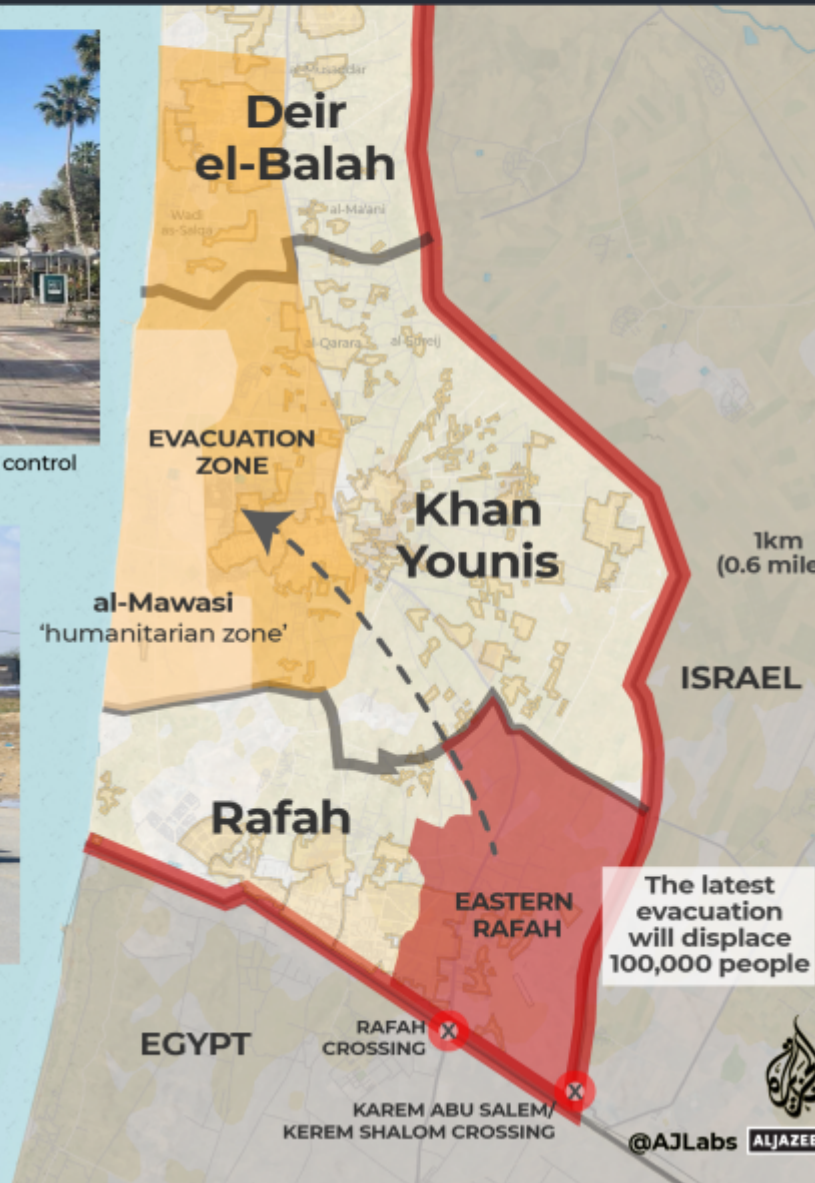

Israeli tanks have taken over the Rafah border crossing, Gaza's aid lifeline. The only crossing with Egypt is both an entry point for humanitarian workers entering Gaza and a crucial exit for critically sick and injured people seeking treatment abroad.

With Saturday's orders, Israeli forces have now evacuated the eastern third of Rafah, pushing into the edges of the heavily populated central area.

Rafah, May 11 (RHC)-- Israel issued new evacuation orders in Gaza's southern city of Rafah, forcing tens of thousands more people to move as it prepares to expand its military operation. With Saturday's orders, Israeli forces have now evacuated the eastern third of Rafah, pushing into the edges of the heavily populated central area.

Reporting from Deir el-Balah in central Gaza, Al Jazeera's Tareq Abu Azzoum said: "Israeli authorities dropped leaflets and made phone calls for more evacuation orders. They are now ordering people to flee from central areas of Rafah, not only the eastern portions, where battles are now raging."

Earlier on Saturday evacuation orders were issued for Shaboura and the vicinity of the Kuwait Specialty Hospital, Abu Azzoum said, adding that "people are told to flee because these areas will in the future become a military operation zone for the Israeli army. The situation is completely dire."

Saheb al-Hams, a hospital director in Rafah, confirmed that the expanded evacuation order included the Kuwaiti Hospital in Rafah city where countless numbers of patients and injured people are being treated.

"There is no other place for patients and injured people to go to but this hospital," al-Hams said in a video message obtained by Al Jazeera, as he pleaded for "immediate international protection" for the facility.

The orders come in the face of international opposition and criticism. President Joe Biden has already said the United States will not provide offensive weapons to Israel due to its Rafah offensive.

The United Nations and other agencies have warned for weeks that an Israeli assault on Rafah, which borders Egypt near the main aid entry point, would cripple humanitarian operations and cause a disastrous surge in civilian casualties.

More than 1.4 million Palestinians have been sheltering in Rafah after fleeing the Israeli military's bombardments in other parts of the enclave. Considered the last refuge in the Gaza Strip, the evacuations are forcing people to return north to areas devastated by previous attacks.

People have already been displaced multiple times and there are few places left in the embattled Strip to move to. Those fleeing fighting earlier this week erected new tent camps in the city of Khan Younis, which was half destroyed in an earlier Israeli offensive, and the central city of Deir el-Balah, straining infrastructure.
