

Doctors without Borders nurse describes horrific scenes in Deir-al-Balah, calling it apocalyptic

Image not found or type unknown

Rafah, June 7 (RHC)-- A medical adviser with Doctors Without Borders in Gaza, Karin Huster, said there has been an "insane escalation of hostilities" across the Gaza Strip over the last two days.

Talking with reporters, the nurse said: "We have seen hospitals being bombed. We have seen refugee camps being bombed. We have seen humanitarian warehouses being bombed. The situation is apocalyptic. This morning on my way to the hospital, I saw two donkeys carrying the bodies of at least eight people who had died in the hostilities of the last night."

And Karin Huster with Doctors without Borders added: "When we arrived, the emergency room was

completely packed. There were families screaming. There was a man screaming for his family that had died.”
