U.S. aid pier as part of Nuseirat
massacre killing more than 200
Palestinians*

New York, June 9 (RHC)-- The Israeli military used a U.S.-built pier, which has been purportedly installed to transfer aid to the Gaza Strip, to facilitate a massacre against a refugee camp located in the central part of the coastal sliver, a report says.

Israeli forces carried out the massacre against the Nuseirat refugee camp on Saturday, killing more than 200 Palestinians. According to The Cradle online news magazine: "They [the troops] were flown out of Gaza via the U.S.-built pier, which had been reinstalled on the coast on Friday after undergoing tens of millions in repairs."

At least 210 Palestinians were killed and more than 400 others injured when the Israeli military carried out dozens of airstrikes against the besieged territory. The regime's forces directly targeted civilians, including children, during "a barbaric and brutal aggression" against the Nuseirat camp, Gaza government media office said.

The operation came during a genocidal war that the regime has been waging against Gaza since last October. At least 36,801 Palestinians, mostly women and children, have been killed and 83,680 others wounded in the war that was launched following a retaliatory operation by the Palestinian territory's resistance movements.

The brutal military onslaught enjoys unreserved military and political support on the part of the Israeli regime's Western allies, including the United States.

Prior to the operation that targeted Nuseirat, the Palestinian resistance movement Hamas had repeatedly warned that the floating pier was built to deliver weapons to the Israeli regime.

"The pier is intended to provide cover for Washington's support for the occupation with weapons," Hamas said last month.
