

Israel has systematic strategy of making Gaza uninhabitable

Gaza City, June 17 (RHC)-- Reporters on the ground in Gaza say that the deliberate and intentional destruction of all means of life, including public facilities, infrastructure, as well as residential homes, has turned entire residential blocks and homes and areas into piles of rubble across the Gaza Strip.

One journalist said: "Just a cursory look at what's going on feeds into one conclusion: Israel and its military, an occupying force on the ground, are doing whatever in their power to make Gaza uninhabitable, and that includes the deliberate destruction of residential homes."

With the ongoing systematic demolition of their homes either in the northern part of Gaza City, the central areas and right now what we're seeing in Tal as-Sultan in Rafah City, hundreds upon hundreds of homes

are being demolished.
