

Gazans say the dead are the lucky ones, emphasizing that the wounded suffer immensely

Image not found or type unknown

Gaza City, June 21 (RHC)-- Human Rights Watch (HRW) said Palestinians in Gaza have told them that death is preferable to being wounded in Israel's war on the territory because the injured "suffer so acutely due to the Israeli authorities' blockade of lifesaving aid."

“UN member states should do more to prevent further atrocities,” the rights group said, in a statement to the UN’s Human Rights Council on Wednesday.

“No more civilians should be killed or wounded by unlawful attacks, die from malnutrition and dehydration, and be deprived of access to medical care,” HRW said.
