

Hezbollah escalates hostilities with major offensive against Israel

Beirut, July 6 (RHC)-- The Lebanese resistance group Hezbollah has launched a new attack on Israeli military positions, while the bombings of the Zionist regime were even greater than the attack yesterday.

According to Israeli media, about 200 aerial projectiles were seen rising from the Golan Heights, occupied territory to Syria. Drones were also reportedly used to attack Israeli military positions.

In response, Zionist forces attacked Lebanese border territories with fighter jets and drones, killing at least one person.

The attacks by the Lebanese resistance are in response to the assassination of Mohammad Naameh Nasser, a senior Hezbollah commander, by Israel. Hezbollah's response started yesterday with dozens

of Katyusha rockets and Falaq missiles from Iraq, against the Israeli state and occupied border territories.

The exchange of attacks between the Israel Defense Forces and Hezbollah has been intensifying since the beginning of the Israeli offensive in Gaza and the attacks against the Palestinian resistance Hamas.
