Gaza City, July 14 (RHC)-- The Municipality of Gaza says Israeli forces have destroyed water sources and networks in Gaza City's Shujayea and Sabra neighbourhoods.

Israeli bombing completely destroyed two wells in Shujayea and Sabra and severely damaged another two wells in Shujayea, it said on X.

"This destruction increases the water crisis and the state of thirst that the city is experiencing, especially during the last two weeks," the municipality said.

Since the start of the war in October, Israeli forces have completely destroyed 42 wells, partially destroyed 16 wells and destroyed about 70,000 linear metres of water networks.
