

Emergency room physician in Gaza asks why the world allows Israel's genocidal atrocities to continue

Gaza City, July 14 (RHC)-- Dr Mohammad Subeh, an emergency room physician working in central Gaza, relayed victim accounts of the Israeli attack on al-Mawasi that killed at least 90 Palestinians and wounded 300 others.

“People are describing how the ground essentially turned upside down on individuals. They’re digging people out of the ground. Hospitals have ceased operations except for those victims they’ve received,” Subeh told Al Jazeera.

“This is just one of the cruel ways this population is being systematically targeted and killed off. People are living in such poor conditions that you cannot even imagine. You wonder to yourself how the world is still silent and standing idle and not doing anything to stop these atrocities. What will it take?”
