

New report from Defense for Children International details Israel's pattern of kidnapping, torturing and humiliating Gazan children

New York, August 23 (RHC)-- A new report from Defense for Children International Palestine says Israeli forces are detaining and torturing Palestinian children in Gaza, using children as human shields and “intentionally and systematically” separating children from their families.

The report includes testimony of children survivors, including the case of many boys who were forced to strip naked and walk with their hands bound in front of Israeli tanks and bulldozers. The children were also beaten, denied water and threatened with dogs.

Sixteen-year-old Abdulmunim, who was abducted with his younger brother Ali, said he was barely able to move after Israeli forces blindfolded them, tied them up and beat them with rifles before leaving them in the cold.
