

500th U.S. airlift of arms to Israel sparks more protests

Washington, September 5 (RHC)-- As Israel's genocide in Gaza nears its 11th month, anti-war activists continue to rally and demand that President Joe Biden and Vice President Kamala Harris stop arming Israel.

At one protest, organized in Washington, DC, a U.S. Navy veteran told the crowd at a rally: "The Biden administration just sent its 500th airlift of weapons to Israel since October 7th last year, combined with over 100 shipments by sea; that's nearly two arms deliveries every single day, undermining Democrat claims that they are genuinely working for a ceasefire."

Vice President Kamala Harris, recently installed as the Democratic Party's presidential candidate in this November's election, has made it clear that she unconditionally supports Israel.

One demonstrator said: "I don't think Kamala Harris, if she wins and becomes the President of the United States, will do any good for the Palestinians or the Middle East; she will work in favor of apartheid Israel."
