U.S. launches investigation after leak reveals details of Israel's plan to attack Iran

Image not found or type unknown

Washington, October 22 (RHC)-- The Biden administration has launched a probe after highly classified U.S. intelligence documents were posted online showing that Israel is taking steps to launch a retaliatory attack against Iran.

One document came from the National Geospatial-Intelligence Agency, the other from the National Security Agency. The documents reference recent drills involving air-launched ballistic missiles, as well as covert drone activity.

Over the weekend, President Biden was asked if he knew how and when Israel would attack Iran. Biden responded by saying: "Yes and yes."

The leaked documents also confirm Israel has nuclear weapons -- a fact that has long been known but has never been acknowledged by Israel.
