Aleppo and Idlib countryside suffer Israeli attacks

Havana, Nov 9 (RHC) The Israeli regime's warplanes attacked several places in the rural countryside of Aleppo and Idlib in Syria, leaving several wounded among the Syrian soldiers.

The official local agency, SANA, quoted a military source as saying, "The Israeli enemy launched an airstrike from the southeastern countryside of Aleppo, targeting several locations in the countryside of Aleppo and Idlib, resulting in the injury of a number of soldiers and causing some material damage."

Israel regularly carries out attacks on the Syrian territory, despite the fact that Damascus has asked the United Nations Security Council (UNSC) several times to stop the Israeli regime's attacks.

The Zionists are intensifying their aggressions against Syria in parallel with the war they are waging against Lebanon and Gaza.

This Tuesday, the Israeli army's warplanes attacked an industrial zone and several residential buildings in the province of Homs, near Lebanon. (Source: HISPANTV)
