Tel Aviv, November 12 (RHC)-- Israel's military announced it has secured 25 next-generation F-15 fighter jets from Boeing.

The \$5.2 billion deal is part of a larger U.S. funding package to Israel approved by Congress and provided by the Biden-Harris administration. Many Gaza residents fear Donald Trump's election won't bring an end to the flow of weapons that have laid waste to much of Gaza.

Walid Abdul Wahab: "Biden sent a lot of weapons, rockets, bombs, you know. Those weapons helped the Israeli occupation do their disgraceful acts to the Palestinian people, and the Gazans especially."
