

U.N. Committee on Palestinian Rights warns Israel's assault on Gaza has characteristics of genocide

United Nations, November 19 (RHC)-- The United Nations' special coordinator for the Middle East peace process has warned the Security Council that conditions in Gaza are "among the worst we've seen during the entire war and are not set to improve."

The warning came as Sri Lanka's U.N. ambassador delivered an annual report by the U.N.'s special committee on Palestinian human rights. Peter Mohan Maithri Pieris said: "This year's report examines the mass civilian casualties and life-threatening conditions intentionally imposed on Palestinians in Gaza. Our findings conclude that Israel's methods of war align with the characteristics of genocide."
