Two young boys lie on a hard hospital bed as health workers treat them while being attacked by Israeli forces

Gaza City, November 20 (RHC)-- The director of Kamal Adwan Hospital in northern Gaza says the facility is experiencing an "extreme catastrophe" with Israeli forces firing on the building as children and elderly patients suffering from malnutrition seek treatment there.

Al Jazeera's Moath al-Kahlout has managed to gain access to the besieged Kamal Adwan Hospital. He says Israeli forces have destroyed the last remaining ambulances in north Gaza, making it that much more difficult for Palestinians wounded in the relentless Israeli bombardment to seek medical help.
