Ahli Baptist Hospital by their relatives after an Israeli attack on a house in Jabalia Nazla area in the northern Gaza City, Gaza on December 21, 2024. (By Anadolu Agency)

Gaza City, December 26 (RHC)-- The UN agency for Palestinian refugees (UNRWA) says the northern part of the Gaza Strip has been going through "the hell of the hell" amid Israel's bombing campaign on civilian facilities and blockade of aid for almost three months.

In an interview with Irish state media RTE on Wednesday, UNRWA Communications Director Juliette Touma said northern Gaza has witnessed "heavy, heavy bombardment," as well as loss of life among civilians and attacks on hospitals and shelters.

She was also asked about the situation in the Kamal Adwan hospital, which is still barely functioning in northern Gaza despite an Israeli order to shut down and evacuate.

Touma said the evacuation orders of medical centers and raids on them "have become commonplace in Gaza" since last October, when Israel unleashed its genocidal war on the Palestinian territory. "We shouldn't become numb, though, to the fact that this happens all the time. Because, at the end of the day, this is a violation of international law," she added.

"This is crossing a very thick red line and way too many times the rules of war have been broken in Gaza, and those responsible must be held accountable."

Over the past few months, Israel has used tanks, snipers and quadcopters to attack the Kamal Adwan hospital, where over 400 civilians have sought medical care and shelter.

On Wednesday, Physicians for Human Rights - Israel (PHRI), an Israeli NGO that advocates for medical rights, filed an urgent petition with the regime's top court to end the ongoing attacks on the Kamal Adwan hospital.

The petition calls for the establishment of a humanitarian corridor to deliver medical supplies, fuel, and for the safe evacuation of patients and staff.

"The relentless attacks on Kamal Adwan hospital have caused catastrophic harm to medical infrastructure, claimed the lives of patients and staff, and denied access to essential healthcare services," it said.

"Under international law, Israel is obligated to protect the safety and security of patients, medical personnel, and healthcare facilities—even in times of conflict."

Israel launched its brutal Gaza onslaught on October 7, 2023, after the Palestinian Hamas resistance group carried out a historic operation against the usurping entity in retaliation for its intensified atrocities against the Palestinian people.

So far, the occupying regime has killed at least 45,361 Palestinians, mostly women and children, and injured 107,803 others, in Gaza.

Since early October, Israel has intensified its attacks in the northern Gaza Strip, cut the area off from the rest of the territory, and blocked nearly all food aid from entering the region.
