

United Nations chief warns Israeli leaders seeking to fully annex West Bank

Davos, January 24 (RHC)-- United Nations Secretary-General António Guterres has warned that Israeli leaders have turned their attention from Gaza to the West Bank, hoping to annex the territory once and for all.

Antonio Guterres spoke at the World Economic Forum in Davos.

“Israel, feeling emboldened by the military successes that it has had, to think that this is the moment to do the annexation of the West Bank and to keep the Gaza in a kind of a limbo situation with an unclear — unclear form of governance. It is clear for me that Israel is not fundamentally interested in Gaza. It’s fundamentally interested in the West Bank.”
