Israel's genocidal attacks on Gaza continue after breaking ceasefire, killing more students and aid workers

Gaza City, March 29 (RHC)-- Predawn attacks by Israel have killed at least 14 people in Gaza. In total, more than 830 Palestinians in Gaza, many of them children, have been killed by Israeli fire after Israel unilaterally shattered the ceasefire less than two weeks ago.

Over a dozen aid workers have been killed or gone missing in recent days, including workers from UNRWA, Palestine Red Crescent Society and World Central Kitchen.

In other news, Israel is also escalating its attacks on Lebanon, where it has repeatedly violated the ceasefire agreed to in November.

A strike on Friday morning in the southern town of Kfar Tibnit has killed at least one person and injured eight others, including children.

Meanwhile, scenes of chaos are being reported in the capital Beirut after Israel issued warnings to residents in the Hadath neighborhood it was about to bomb the area.
