

Cuba to Celebrate Event of Nanoscience and Nanotechnology

Havana, February 6 (RHC) — The Fifth International Seminar on Nanosciences and Nanotechnologies will convene in Havana in September, according to Dr. Fidel Castro Diaz-Balart, scientific advisor to the Council of State.

We hope that attendance is higher than in the fourth edition of the meeting in 2012 when we had the presence of more than 300 specialists from 22 countries, reported Castro Diaz-Balart.

He added that discussions will be at the Palace of Conventions in Havana, from September 14th to the 18th and are conceived as an academic forum for exchange of knowledge and experience to the scientific debate about the main features and trends related to nuclear science in the world.
