

ISIS releases video of Yemeni soldiers execution – report

Sanaa, May 2, (RHC), – A branch of the Islamic State in Yemen has released footage showing the beheadings of four Yemeni soldiers and the shooting of 11 others, an observer said. It comes a week after the group declared its official presence in the war-torn country.

Islamic State militants (IS, formerly ISIS) appeared to wield knives and kill four of the soldiers. Their heads are later seen on the ground. The clip then shows 10 other blindfolded and crouching soldiers. They are shot in the forehead, while one is hit from behind.
