

Russia to Assist Cuba in Construction of Four Power Units, Steel Plant

Havana, June 26 (RHC) — Russia and Cuba are in the final stage of coordinating new energy and steel projects, according to Russian Ambassador to Cuba, Mikhail Kamynin.

According to the Russian ambassador in Havana, the next few days will see the culmination of the coordination phase for these projects, which involve the construction of four power units and the modernization of a steel plant.

The ambassador added that the energy and metallurgy industries are highly important for Cuba at a time when the country's economy is on the rise.
