

Russia Includes Heberprot-P in List of Essential Medicines

Moscow, Sep 5, (RHC), -- In other news from Russia, for the first time ever, a Cuban biotechnology product, Heberprot-P, was included in the list of Essential, Vital Medicines by the specialized commission of the Health Ministry of Russia in session, Friday in Moscow.

Under Russian law, the expert group's resolutions have to be ratified later by the president of Russia. However, it was confirmed that this effective medicine against diabetic foot ulcer is on the list, said sources of the said commission.
