

France Carries Out First Airstrike in Syria Against ISIL

Paris, September 28 (RHC)-- France has carried out its first airstrikes in Syria against the self-proclaimed Islamic State, making it the latest country to expand its anti-ISIL bombing campaign to Syria.

The move is a reversal from France's earlier position that international law prevented it from attacking targets in Syria. French Prime Minister Manuel Valls said the bombing would continue "as long as it's necessary."
