

Cuba's Meteorological Institute Issues Tropical Storm Warning for Eastern Provinces

Havana, October 2 (RHC)-- The Forecast Center of the Institute of Meteorology of Cuba has issued a Tropical Storm Warning for the provinces of Camaguey, Las Tunas, Holguin and Guantanamo as a result of Hurricane Joaquin. The hurricane has winds of up to 215 kilometers per hour and heavy rains which also affect eastern and central Cuba.

The Category 4 hurricane, on a maximum scale of five on the Saffir -Simpson scale.

The Cuban weather institute also reported that because of the proximity of the hurricane to the coast, the situation would continue for the next few days.

The Weather Center also announced that the situation would continue for the next few days.
